Keyword Page Optimization

We research, analyze and select the best keywords to target to drive qualified traffic from search engines to your website.

Content Development

We understand the fact that content development and distribution is vital to the SEM program of any business. We make sure that content is created and distributed the right way.

Engage your customers

We make sure that your content is effective at converting visitors into customers while providing the very best web experience possible.

Measure with Web Analytics

We use Analytics with all SEM programs and we provide our clients with a monthly analytic report that explains what is happening with our clients website and Internet presence.

PAST SEMINARS

Very clear in explaining topics. I am satisfied with the seminar. - L. Kin

It is a marketing breakthrough for my current business. - M. Johnson

Excellent seminar. Friendly and accommodating instructor. - J. Jimenez

YOUR PATHWAY TO A SUCCESSFUL INTERNET PRESENCE

NOT HAVING AN INTERNET PRESENCE TODAY IS LIKE NOT BEING LISTED IN THE YELLOW PAGES 10 YEARS AGO.

NOW EVERY BUSINESS WHO WISHES TO SUCCEED MUST HAVE AN INTERNET PRESENCE AND YOUR WEB PAGE MUST EFFECTIVELY CONNECT WITH CUSTOMERS ONLINE USING MOBILE DEVICES, A SMARTPHONE OR TABLET.

Engage with Local Customers

80% of all the population in the greater Tijuana area surf the web using a mobile device. This means that if you want to have a good chance of connecting with your local customers online then your Internet presence must respond and adapt to the mobile device. Your contact information needs to be visible and your content needs to engage the viewer with a call to action.

SEO Search Engine Optimization

SEO for local search results begins with researching and identifying the keywords that your customers use when looking for your service or product online. Another very important component is the location of your business. The search engines must understand what you sell or provide as well as where your business is located.

Measure Using Web Analytics

Web analytics provides insight into what's happening with your Internet presence. Furthermore, analytical data can be used to identify what is working and not working with your marketing campaign. Without web analytics is like flying blind.

TAKE ADVANTAGE OF OUR GEOMARKETING, SEM, & E-COMMERCE SOLUTIONS

GEOMARKETING PROGRAM
The NeuroMama.com Geomarketing program is designed to provide a quick and easy mobile responsive Internet presence to businesses who need a way of connecting to local customers. The program includes keyword advertising on NeuroMama.com, business page on Local.neuromama.com, and an opportunity to sell on the Neurozone.

SEARCH ENGINE
Our all inclusive SEM programs provide everything that a business needs to succeed on the Internet. This includes keyword advertising on NeuroMama.com, business page on local.neuromama.com, mobile responsive website, social network presence, directory listings, content distribution, and web analytics for measuring progress

PLATINUM E-COMMERCE PROGRAM
The Platinum E-commerce program is designed for serious Internet retailers. We begin by building a retail store using a shopping cart platform specific to selling products online. Then we will work with your business on choosing shopping channels and marketplaces to connect to. We will create a product data feed which will automatically distribute your products across 100 possible online shopping channels and marketplaces. Next we will build an industry specific affiliate network program.
